WANBEL RESEARCH SYMPOSIUM 2026

# How each session works

1

## Keynote

The world picture: what research elsewhere is telling us

→

2

## Panel

What it means here, in Papua New Guinea and the Pacific

→

3

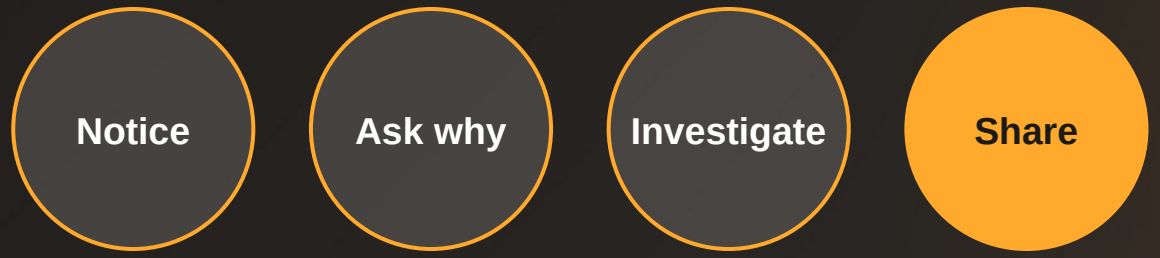

## Your turn

Turning what you have heard into shared research questions

WANBEL RESEARCH SYMPOSIUM 2026

# Our focus this week: SoTL research questions

THE SCHOLARSHIP OF TEACHING AND LEARNING

What good educators already do, taken one step further: investigated systematically, with evidence, and shared so others can build on it.

**Focused**
One clear idea

**Shared**
Matters across institutions and countries

**Answerable with evidence**
Surveys, interviews, grades, observations, student work

**Open**
Asks how, what or to what extent

TOO BROAD

*“Is AI good for students?”*

A SHARED SOTL QUESTION

**“How does using AI-generated practice questions change first-year students’ confidence in mathematics across Pacific universities?”**
